

Our Curriculum Vision:

Children are at the heart of all we do. We are all passionate about ensuring our children achieve the best outcomes and develop a love of learning which lasts a lifetime.

We share a culture of collaboration and our team of highly skilled staff work passionately to create inspiring learning opportunities and improve life chances for all.

Our aim is to ensure that each and every child leaves us fulfilling their maximum potential and ready for the next stage of their learning. We remain committed to ensuring that our pupils value education and become lifelong learners.

Our vision statement is to teach children to love, learn, live as a global citizen in an ever-changing world as encapsulated in our vision 'love, learn, live'.

A Curriculum focussed on sustainability:

As we teach our pupils to love, learn and live as global citizens in an ever-changing world we know there will be many challenges ahead. Climate change is one of the greatest challenges of our time which impacts on all living things. Due to inequalities, global health issues, more frequent and intense natural disasters, natural resource depletion, increase in global temperatures and sea levels rising, we are now at a pivotal point. The survival of many living things and biological support systems of the planet are at risk. We have to act now.

We are committed to working together to educate our pupils about the importance of achieving the Sustainability Development Goals (SDGs) [Sustainable Development Goals](#). We will do this through our curriculum which will deliver and drive key messages about each of our chosen areas.

There are 6 key elements of learning within our curriculum founded on sustainability goals. These elements are key attributes and skills which we aim to instil in our pupils:

The 6 elements and key actions are:

Knowledge - To know more, remember more and be able to do more for the benefit of humanity and the planet.

Equality - To know that everyone's human rights should be protected and respected.

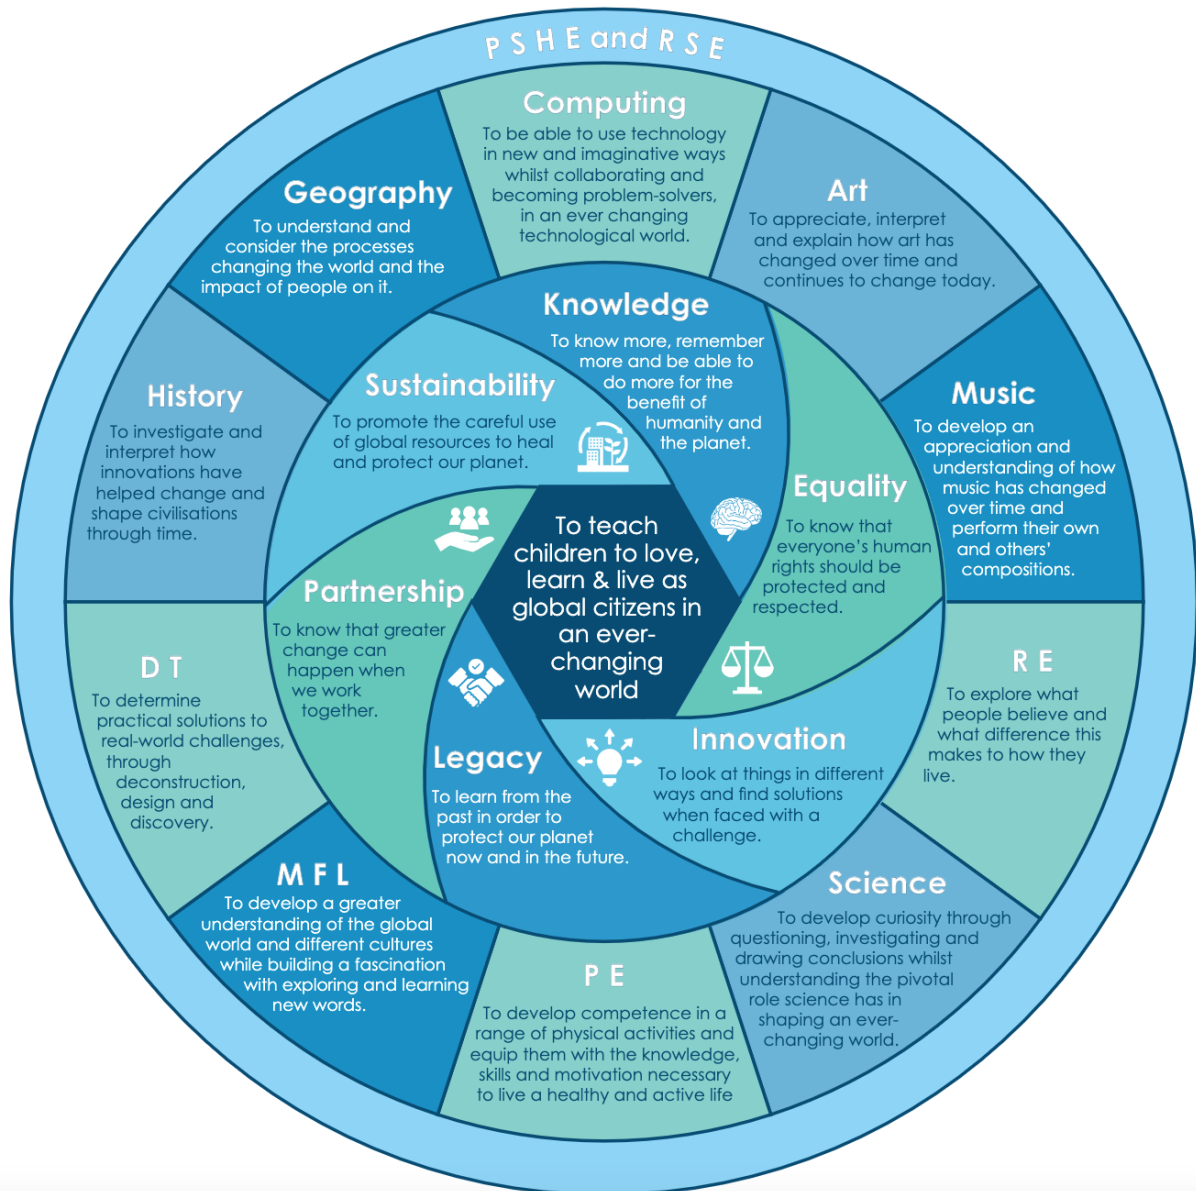

Innovation - To look at things in different ways and find solutions when faced with a challenge.

Legacy - To learn from the past in order to protect our planet now and in the future.

Partnership - To know that greater change can happen when we work together.

Sustainability - To promote the careful use of resources so that they are available in the future.

Our curriculum helps our children to develop the skills and knowledge they need for their future lives as architects, engineers, designers, artists and teachers of the future.

Creating a culture for our vision to succeed

Our STARS values are the characteristics and behaviours we all share, helping to create a strong culture across the Trust. Our shared values help staff and pupils focus on making the right decisions, strive for high standards and help us fulfil our vision **to love, learn, live**.

Our STARS values:

- **Sharing**
- **Trust**
- **Achievement**
- **Respect**
- **Safety**
